## What's New In?

Todomoo is a project manager designed specifically for working on complex multi-tasking projects. The project manager provides a sophisticated workflow for managing multiple projects, which include various task types. Todomoo manages all aspects of a project, which includes tasks, subtasks, documents, attachments, files, notes, time and payment details. It can be launched directly from any directory, such as from the desktop, from the Start menu or from a floppy disk. Key Features Multi-project manager With Todomoo, it's possible to create a project that contains a list of subtasks. Each task will have its properties and parameters, such as a description, due date, completion date, color and priority level. Tasks can also be assigned to other users, when it's not possible to work on a single project. Moreover, tasks can be delegated to other users, with each user assigned his own projects and tasks. Various task types With Todomoo, you can create various task types, including scheduled, recurring, recurring with time-of-day and recurring with date settings. Organization of your tasks In addition to the projects that you can create and manage, you can also create task groups that enable you to organize and organize your tasks in different categories. Documents Todomoo can store and manage files, such as images, digital audio, documents, project documents, etc. Time tracker With Todomoo, it's possible to track the time spent on a project. This is a great feature, especially for freelancers, as it makes it possible to work on more than one project at the same time. Manage your time Todomoo provides several options for managing your time. When you start a project, you can define the start and end dates for the project. You can record your hours spent on a project using the time tracker option. Automatic backups You can back up your entire project database. E-mail notification You can get an e-mail notification whenever a new task is created, when a task is assigned to you or when it's completed. You can also choose which tasks to be included in the backup and exclude certain task types from the backups. Configuration and customization You can switch between English and Japanese languages and the Japanese currency. You can personalize your interface by moving the various buttons and the category bar to where you prefer. Properties of Todomoo: Multi-project manager: With Todomoo, it's possible to create a project that contains a list of subtasks. Each task will have its properties and parameters, such as a description, due date, completion date, color and priority level. Tasks can also be assigned
